## The 1% Secret

This approach was used by the Olympic cycling team and took them to gold.

Have a really close look at everything you do in a day. How could you make each tiny part just 1% easier, better more efficient, more comfortable? Total of all the one percents? Your Superpower!

## TAKE 5 ... STEPS TO WELLBEING

\*Connect \*Keep Learning  
\*Take Notice \*Be Active  
\*Give

\*\*\*Calenders and Lists: get your 'to dos' out of your head. Avoid the stress of trying to remember everything.

\*\*\*Feeling understood is important. Make it easy for others to do their bit. Ask for help when necessary. Be clear and concise. Do not assume others anticipate need as you do.

\*\*\*Some time alone can be the most useful boost but it is usually the most difficult thing to have. Finding just 10 minutes every day will help.

## FOR STRESS

### Drop Anchor...

Push your feet into the ground and notice everything your senses are aware of.

### Breathe

Your body knows how to breathe. Try breathing out first then breathing in slowly to help regulate strong feelings..

# Protect Life 2

Northern Ireland's strategy for the prevention of suicide and self-harm, launched in 2019.

[Protect Life 2 - Suicide Prevention Strategy | Department of Health \(health-ni.gov.uk\)](#)

The Department of Health Permanent Secretary, Peter May, extended the Protect Life 2 Strategy (2019) for a further three years to the end of 2027 at this stage. This will be reviewed by an incoming Minister with the potential for an additional extension to 2029. This decision was taken given challenges in implementing Protect Life 2 against a difficult financial situation and delays due to the necessary response to the COVID-19 pandemic.

As part of the Strategy extension, the Department agreed to undertake a **Review of the Protect Life 2 Action Plan** to inform the future Action Plan and implementation. The aims and objectives of the Protect Life 2 Strategy are not being reviewed and will not change at this point.

**Your experience and feedback is critical for the Review of the Protect Life 2 Action Plan.**

A series of face-to-face workshops (dates/venues in image attached) are being held in February 2024. These workshops we will present the initial analysis of a recent survey and seek more in-depth feedback from you.

The Northern Area Outcomes Group Children with Disabilities task and finish group, is working on producing a resource to support parents with children's behaviours.

At the initial stage of this the group is keen to hear from parents – can you share the below link and QR code to LPG members with the ask that ;

a: they can complete themselves

b: share with parents that they work in their services,

c: share on their socials.

Please note that whilst the NAOG task group is leading on this it will be a regional resource so would be brilliant to hear from parents across the region.

Many thanks

# Helping your child with homework- Top tips

BACK TO  
SCHOOL 

## Start with a nutritional Snack

Before you start homework, provide a nutritious snack and chat with your child about their day, ensuring they feel relaxed before they start their homework.

## Establish a clear routine

It can be helpful to plan a homework timetable for the week so your child is aware of what is required of them on a daily basis, but also include some time for fun.

## Consider their Environment

Provide a space which encourages your child to want to complete their homework. Turn off distractions.

## Encourage your child to find solutions independently

If your child looks to you to give them the answer don't rush in to tell them, encourage them to work through the task to find the solution and answer themselves.

## How I Was Taught ???

Don't try to teach your child your method, as this leads to confusion. If you are unsure of a new technique set a time to speak to your child's teacher.

## Balance your time

As a parent you may be busy during homework time juggling many things. Reduce your distractions to ensure you provide the space to help support your child with homework.

# Vaping

## What is Vaping?

**Vapes**, also known as e-cigarettes, are electronic devices designed to deliver vaporised liquids into your lungs when you breathe in.

This vapourised liquid (aerosol) isn't water. The e-liquid almost always contains nicotine, flavours and either/or a combination of humectants such as propylene glycol, vegetable glycerine or glycerol. These are used to retain moisture and create the aerosol when heated.

Many flavours and humectants have been approved in the UK for oral ingestion but not for inhalation. Therefore, the health risk is not well known, when consumed in this manner. Vapes may also contain other **harmful chemicals** that aren't listed on the pack.

The biggest misunderstanding about vapes is that they are harmless compared to cigarettes. Young people may think there is little, or no risk of personal harm associated with regular vaping. **This is not true.** The long term health implications are unknown - just as they once were with tobacco. There are however increasing concerns about the risks particularly with regard to cardiovascular and respiratory illness. We recommend avoiding the use of vapes other than in a short term attempt to quit.

**IF YOU DON'T SMOKE, DON'T VAPE**

**Emerging research has found that the use of vapes carries health and other risks, as outlined below:**

Most vapes contain **nicotine** and are **highly addictive**

Nicotine has long lasting damaging effects on the **development of your brain**

Vape aerosol is **not water vapour**

Vapes can contain the same harmful chemicals found in **cleaning products, nail polish remover, weed killer and bug spray**

Vapes contain additives, flavourings and chemicals which are **toxic to the body**

Vaping increases your risk of **cardiovascular disease** (Heart attack and stroke)

Vaping increases your risk of **lung disease and asthma**

If you vape you are **three times more likely** to take up cigarette smoking

## Vaping to help quit smoking

We recognise that existing smokers may use e-cigarettes to try and cut down or quit smoking. However, existing smokers who want to use vapes to assist with stopping smoking should only use vapes as a short-term measure, for no more than twelve weeks and supported by a recognised behavioural change programme. Given the increasing health considerations NICHs would advise smokers to only use vapes as a short term measure and to use currently approved by the Public Health Agency to give up smoking.

**Visit [www.stopsmokingni.info](http://www.stopsmokingni.info) for more information on stop smoking services and support. IF YOU DON'T SMOKE, DON'T VAPE.**

## Protection against vaping and smoking

Currently, as with the purchase of conventional cigarettes and alcohol, the legal age to purchase and use a vape is 18 years old and it is illegal for an adult to buy cigarettes or vapes for those under 18 years olds.

NICHs believe the increasing concerns about vaping, especially regarding cardiovascular and respiratory health, are such that we are campaigning to increase the age of sale for vapes/cigarettes to 21. Join our campaign to protect young people by emailing [campaigns@nichs.org.uk](mailto:campaigns@nichs.org.uk)

- I felt so relaxed after each session in the forest.
- It felt so peaceful to get back to nature and I felt so grounded each week.

The session is focused on a different series of skills for the care giver and baby to explore. This is done through mindfulness, gentle movements, massage, gratitude practice, breathing, nature mandala as well as music and stories.
