Northern Ireland  
**HSC Goes Digital**

## Cold weather and winter bugs can affect our health, but there are things we can all do to keep well.

Apps can be a good source of information, advice and motivation.

Using apps and digital tools routinely helps people take control of their own healthcare and plays a key role in improving access to psychological therapies.

The apps can provide information and advice on topics such as managing breathing conditions, stop smoking, keeping active, promoting good sleep and general well being.

Here is a selection of apps to help you manage your health concerns common for this time for year.

## Free laptops for young people in Northern Ireland

Families who can't afford a laptop may be able to get support from [Digital Poverty Alliance](https://digitalpovertyalliance.org/tech4youth/). Their latest programme provides a free refurbished laptop for young people aged 11–16.

It's aimed at young people who are experiencing health issues or disabilities, supporting someone with health needs, have special or additional educational needs, have experience of the care system, or are engaged with family support services.

Applying is straightforward. Families complete a short form, and a trusted professional such as a GP, social worker, school nurse or family support worker confirms that the young person would benefit. This helps ensure the support reaches those who need it most.

Places are limited and allocated on a first-come, first-served basis once verified. More details and the online application form can be found here: <https://digitalpovertyalliance.org/tech4youth/>
