## **Chair's Welcome & Purpose of the Workshop**

Tom welcomed everyone to the meeting and gave a brief outline to the background to the workshop including the preliminary work that took place in February 2020. He gave an outline of how the workshop would run today and encouraged members to focus on the “what do we need to do better together and how” part of the discussion. There was a series of breakout room to discussion the questions. What are we doing now? What's working well? What do we need to do better? How? How will we know we have made a positive change? In relation to the 3 priorities:

*1: All children and YP have the best start in life and are emotionally and physically healthy*

*2: All children and YP are safe and their welfare is promoted within their homes, schools and communities*

*3: All children and young people are supported to thrive and achieve their potential*

(See attached template for full details).

At the end of the workshop members volunteered to take part in task and finish groups to refine the actions from the workshop and work together to take the action forward.
