Agenda Item	Discussion	Action - By Whom
<b>FSH Update</b>	Allison ( <b>Bolster Community / FSH</b> ): Recent drop in referrals from Community Paediatrics and rise in school referrals. Family Support Practitioners are renewing their contacts and strengthening connections with schools, highlighting the straightforward process and how relatively quickly a family can avail of support. Slight rise in self-referrals indicating an improved awareness in the community and trust in the service. Key issues: (i) Emotional and behavioural support for children and supporting parents with many challenges, including poor mental health, financial hardship, isolation, impact of addiction and domestic violence on children. (ii) Supporting families who have children awaiting a diagnosis of Autism and ADHD and those who have a diagnosis facing the same daily challenges around school, sleep, challenging behaviour in the home, anti-social behaviour in the community and the impact this has on the whole family. Unmet need: Therapeutic support for children and families, bereavement support, adolescent services and Autism & ADHD support services.
